

# SUPER CPAP POWER PACKS & AIRLINE TRAVEL

## BATTERY POWER SOLUTIONS

With Travel season just around the corner, Super CPAP Power Packs are the sleek, ultra-portable, & affordable way to power your CPAP machine no matter where your world takes you!

### WHAT KINDS OF BATTERIES ARE ALLOWED IN CARRY-ON BAGGAGE (in the aircraft cabin)?

Passengers can carry most consumer batteries and personal battery-powered devices.

Spare batteries must be protected from damage and short circuit.

**Passengers can bring two (2) larger lithium ion batteries (more than 8 grams, up to 25 grams of equivalent lithium content per battery) in their carry-on.**

**This size covers larger extended-life batteries such as the SUPER CPAP POWER PACK.**

### WHAT IS THE LITHIUM CONTENT (grams) PER SUPER CPAP POWER PACK?

**C-150: 11.7g C-222: 18g C-444: 36g**

### WHAT KINDS OF BATTERIES ARE ALLOWED IN CHECKED BAGGAGE?

**Spare lithium batteries are prohibited in checked baggage.**

### WHAT DOES "PROTECTED FROM SHORT CIRCUIT" MEAN?

Protected from short circuit means that a battery's terminals are protected from being touched by metal. When metal such as keys, coins, or other batteries come in contact with both terminals of a battery, it can create a "circuit" or path for electricity to flow through. This can cause extreme heat and sparks and even start a fire. To prevent short circuits, keep spare batteries in their original packaging, a battery case, or separate pouch or pocket.

### ARE SUPER CPAP POWER PACKS "PROTECTED FROM SHORT CIRCUIT"?

**YES.** Super CPAP Power Packs are built within a protective aluminum alloy scratch resistant shell. Built in circuitry protection also protects against thermal run-away and overheating.
